

# COSMIC WATCH

by Celestial Dynamics

Celestial Dynamics

## DESCRIPTION

The Cosmic Watch 2.0 is a high quality 3D planetarium and a timepiece. Fly over planet earth and explore the solar system. Point your phone or tablet towards the sky and experience it in augmented reality. Get to know the constellations, stars, and planets in your sky. Travel to the past, present and future and see how time is related to the movements of the solar system.

The Cosmic Watch is for everyone who loves the planet earth and wants to unlock the secrets of the celestial vault. It's a must have for nature lovers and outdoor adventures, amateur astronomers and stargazers, clock fans and science fiction geeks.

Unique features are the clock's ability to show the concept of the celestial sphere and display the geocentric movements of the planets. The app is designed with exploration in mind. It gives users the freedom to seek and discover while stunning visuals fuel the imagination and provide inspiration to search even further.

Price: 5 \$
